

Bio_Siyao Wang

I am a graduate student in the Department of Chemical and Biomolecular Engineering co-advised by Dr. Saad Khan and Dr. Gregory Parsons. My research is focused on fabrication, characterization and functionalization of an intrinsically microporous nonwoven for applications in protective textile, using Polymers of Intrinsic Microporosity (PIMs). Prior to graduate school, I obtained my bachelor's degree in Polymer Science and Engineering from Zhejiang University in China. Outside from lab, I enjoy yoga, cooking, travel and food photography.
