

Abhilash Sankaran is a PhD student at Multiscale Mechanics and Nanotechnology Laboratory in University of Illinois at Chicago (UIC), where Abhilash Sankaran is involved in several theoretical and experimental studies on electrostatic atomization, interfacial phenomena and mechanical behavior of polymer fibers.

Abhilash has worked as both research assistant and teaching assistant in UIC. Before starting at UIC, he has one-year experience as research assistant at Indian Institute of Science (IISc). He was involved in research on microbubble drag reduction in turbulent boundary layer at IISc.
