

Srivatsan Ramesh is a third year Ph.D. student with the Department of Chemical and Biomolecular Engineering (CBE) at NC State. He is co-advised by Dr. Genzer, Dr. Khan, and Dr. Menegatti and his research focuses on synthesizing stimuli-responsive polymers and incorporating them on nonwovens to make smart nonwovens. He completed his undergraduate study in Chemical Engineering at BITS Pilani, Hyderabad, India in 2015. Before pursuing his Ph.D., he worked with Royal Dutch Shell for two years as a process engineer supporting chemical manufacturing plants in Canada, Amsterdam, Singapore, and China. He is actively involved with recruiting graduate students, and mentoring undergraduate students. Away from research, he enjoys playing soccer, hiking, following the financial markets, and reading non-fiction books.
