

Shawn Womble is a graduate student at North Carolina State University and is currently taking up a Master's degree in textile technology. Shawn received his Bachelor's degree from North Carolina State University in textile technology with a minor and business administration. Prior to starting his Master's in the fall, Shawn worked for the NWI as a lab technician and conducted research under the guidance of Dr. Philip Bradford. Shawn is expressing interest in textile electronics since it is a new and upcoming field as well as nonwoven materials especially for use in the medical and protective garments area. He has a background and interests in electrical engineering and has explored and developed basic skills in areas such as civil and architecture, mechanical, CAM, drafting, and computer programming. In the future, Shawn wants to own his own company that combines his natural skills with his trade knowledge and skills in the technology area and would also like to do something with textiles.
