

## SHORT COURSES

"A huge thank you to the instructors and all of the wonderful staff. The course was incredibly helpful, and we learned so much that will aid us in our business going forward. The information on the fundamentals of extrusion and how process parameters affect output product and defect generation was excellent. I also loved being able to apply learnings in the lab." – Staff Scientist, Medical Device Manufacturer

### SHORT COURSES:

- Elementary Nonwovens – Jan 28-29; Oct. 28-29
- Intermediate Nonwovens – Feb. 4-7; Sept. 30-Oct. 3
- Spunbond Technology – Mar. 4-6
- Carded Nonwovens Technology – Apr. 1-3
- Fiber and Filament Extrusion Fundamentals – Jun. 10-12
- Meltblown Technology – Aug. 12-14
- Nonwoven Product Development and Innovation – Sept. 9-12
